

Center O Flying Club / Power Loss At 300 Feet AGL--What Went Wrong - What Went Right

Event Details

Philip Mandel CFI and his primary student experienced significant power loss at 300 feet AGL over Vancouver WA off Pearson Field (KVUO) in 2019. With the help of dashcam video that captured the event, Philip will share lessons learned from the scariest two minutes of his life. He says he did more things wrong than right, yet still managed to nurse the Beech Musketeer back to the field and land opposite direction without bending anything.
