

FAASTeam May 2024 Topic Of The Month - Energy Management (Part 2 of 2)

This month's TOM is Part 2 of understanding the fundamentals of aircraft energy - principles, total energy, energy exchange, energy management, and how we use flight controls, including the throttle, to move our craft between different energy states.

We'll will apply the knowledge from Part 1 and will look at energy management applications, including usual (and not so usual) flight situations and scenarios.

A PDF of the Part 1 presentation can be found here: [Energy Management Part 1 PDF](#)

**Lead Representative Stephen
Bateman n/a**

- Proficiency in both fundamental and advanced maneuvers are the result of truly understanding the “energy equation” at any place and time
- We must build the competency, via training and proficiency, to effectively coordinate control inputs to achieve and maintain altitude and airspeed targets, and to recover from energy deficit situations

Join FAASTeam Lead Representative and *WINGS*Pro, Steve Bateman, for this month's 33-minute webinar on aviation safety and education topics.

Please register for the FAASTeam May 2024 Topic Of The Month: Energy Management (Part 2 of 2)

REGISTER HERE

After registering, you will receive a confirmation email with information about joining the webinar.

A message from the National FAASTeam Manager
