

## Avoiding Over-Reliance on Automation and Technology

In this presentation we'll talk about recent studies that deal with pilot management of automated aircraft systems. As the General Aviation fleet equips with advanced technology, those studies have identified Over-reliance on automation as an emerging causal factor in accidents and incidents. We will discuss strategies for getting the most out of your automation without the automation getting the better of you.

Join us in the Mezzanine Classroom overlooking the Howard Hughes Spruce Goose. From the main entrance, use the curved stairway to your right to ascend to the Mezzanine. The classroom will be on your right at the top of the stairs. An elevator to the Mezzanine is available upon request.
