

Citabria to Convective Clouds - Stories from an FAA Weather Briefer

Veteran FAA weather briefer, flight instructor, and Ninety-Nine Debra Plymate shares stories and insights from a lifetime in aviation—from her early flying lessons in a Citabria to briefing legendary test pilots such as Scott Crossfield.

Explore how pilots can use 500-mb charts, radar, satellite imagery, and other weather products to recognize Northwest weather patterns and anticipate changing conditions. Debra will demonstrate practical ways to interpret complex weather information and turn it into useful information for safer, more informed flying decisions.
