PDX FSDO FAASTeam presents:

ForeFlight for the VFR Pilot

Join **Sarah K. Baker, CFI** for a hands-on seminar designed to help VFR pilots get more out of ForeFlight. Whether you're new to the app or looking to streamline your workflow, this session will cover practical tools and techniques to make flight planning easier, more organized, and more efficient.

Topics include ForeFlight essentials, VFR flight planning, route creation, checkpoints and cruising altitudes, weather resources, go/no-go decision making, charts and airport information, in-flight use, cockpit resource management, and common mistakes pilots make when using the platform.

This seminar is ideal for student pilots, newly certificated pilots, and experienced aviators looking to get the most from one of aviation's most powerful flight planning tools.

Located at the Twin Oaks Aircraft Rental Classroom.
