

“Flying the Backcountry Safely Easy as 1, 2, 3!”

Presented by

Lori MacNichol

Founder & Owner of McCall Mountain/Canyon Flying Seminars

This seminar will focus on safety, the finer points of drainage navigation, airspeed control, and airstrip observation that will make specialized approaches and departures delightful possibilities with comfortable outcomes. The speaker Lori MacNichol invites you to treat yourself to the next level of airmanship and experience the Idaho and Utah backcountry through this multimedia presentation which includes digital video of the backcountry.

Having been flying in the backcountry of the Western US since 1982, Lori will share with us how to enjoy our beautiful backcountry mountain airstrips safely and do it with respect to all who use them. Lori holds Commercial and Instructor ratings as well as an ATP, multi-engine and seaplane ratings. She is a proponent of saving our backcountry airstrips all across the US and has testified at Congressional hearings in Washington DC.

Registering at this presentation can go towards Wings credit.
