

# Webinar Series – Maintaining Aircraft Control by Mindstar Community Aviation

Loss of Control (LOC) is on the NTSB most wanted list for 2015. Most LOC accidents occur during the maneuvering phase, and often culminate in a stall/spin. Dispel a “dirty dozen” stall/spin myths that are often perpetuated during flight training. Do slow speeds really lead to stalling? Are slips as dangerous as skids? Get the facts on these and more! Rich Stowell has performed more than 33,000 spins and is the 2014 National FAASafety Team Rep of the Year.

**Directions:** To register and for more information, visit <http://www.communityaviation.com/12-stall-spin-myths>. After registering, you will receive a confirmation email with instructions for joining the webinar on the GoToTraining platform. Check your email Spam folder just in case. Webinar hosted by Mindstar Community Aviation.

## A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.  
Sign up for the FAA's safety services at [www.FAASafety.gov](http://www.FAASafety.gov)!

## Event Details

Mon, Oct 12, 2015 - 20:00 EDT

Webinar - Online Only -  
Registration Required
