

Aeronautical Decision Making - The History & How We Learn

Aeronautical Decision Making has been around since Orville & Wilbur started flying, so why is it that we only recently started talking about it? Let's examine where it started, how we used to learn in the "old days" and how do we learn ADM skills today. What attitudes and personal issues can change your thought process and ability to learn?

Directions: The Ferry County Airport is located 6 miles north of Republic, WA on Highway 21 North. The airport is located at the Southeast end of Curlew Lake. The safety presentation will be in the public forum tent.

A message from the National FAASTeam Manager

Over 10,150 AMTs earned an AMT Award last year. Will you, this year?
