

Aeronautical Decision Making - The History & How We Learn Not to Repeat the Same Mistakes

Over 75% of the accidents that we encounter today are directly caused by poor ADM. This has been the case since the beginning of flight, and the numbers don't seem to drop. How come? Are we forgetting about aerodynamics? Are we forgetting to plan for winds, weather and other contingencies? Or did we never learn the basics of how to make a good decision? Lets discuss these ideas and others as we explore ADM and today's pilot.

Directions: Follow signs to Pasco Airport. Take 20th Ave to Argent. Turn right onto Argent. Go to east side of field. Turn left onto Stearman. Follow Stearman to Bergstrom's on left side of street.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area
Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASTeam) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.

Event Details

Wed, Mar 27, 2013 - 6:30 pm

Bergstrom Aircraft FBO

4102 Stearman Ave.

Pasco, WA 99301
