

# Performance, Planning, Emergency Procedures, Risk Management, and Mitigations

It's night, it's dark, and you are flying along contentedly when all of a sudden you hear roughness...then nothing. The engine stops. There is nothing but silence. Now all of your skill sets come into action at one time--aircraft control, where to land, reading the winds from the surface conditions, panic control and survival. Remember when you used to look at your flight instructor for the answer to saving the day? Now it's up to you.

**Directions:** Follow signs to Tri-Cities Airport (KPSC). Take 20th Ave. exit. At corner of 20th & Argent follow Argent east to Stearman. Turn left. Follow Stearman about 3/4 mile. Bergstrom's is on left.

## A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at [www.FAASafety.gov](http://www.FAASafety.gov)!

## Event Details

Wed, Apr 23, 2014 - 6:30 pm
