

Chart Challenge: Approaches

Knowing what's on the chart is one thing; knowing how to apply it in the real world is something else. Will you make the right choices on these approaches? Be prepared for a highly interactive discussion! Using two scenario-based exercises, this seminar will examine the skills needed to translate the information shown on an approach chart into safe decision making. In particular, how to build situational awareness and contingency planning will be examined. This seminar will also include a brief review of chart elements and format.

Directions: Held during AOPA Summit.

A message from the National FAASafety Team Manager

Over 10,150 AMTs earned an AMT Award last year. Will you, this year?

Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASafety Team) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
