

AOPA Foundation presents:

Weather Challenge

You don't need a meteorologist-level understanding of weather to be a good pilot—though to judge from some of the educational materials out there, you might think so. Skew-T diagrams and moist adiabatic lapse rates are all well and good, but for most of us it's the practical stuff that matters.

With that in mind, our new seminar is aimed at bolstering your real-world weather wisdom—and having a little fun, too. As with our recent “Chart Challenge” seminar, we'll put your knowledge to the test, quizzing you on everything from METAR/TAF decoding to real-world weather scenarios. Along the way we'll cover:

- The most important weather resources for pilots
- Critical tie-ins with risk management and decision making
- Weather-related accidents that didn't need to happen
- The promise (and pitfalls) of cockpit weather

Directions: Southern Museum of Flight

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASteam) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
