

AOPA Foundation presents:

# Accident Case Study: Live

To the average person, it might seem a bit morbid that pilots pay so much attention to aircraft accidents. After all, when was the last time you saw an article about an accident in a car magazine? But flying isn't like driving, and accidents deserve attention: They let us learn from others' mistakes, help us think critically about our skills, and provide a mental "nudge" if we find ourselves in similar situations.

With that in mind, the Air Safety Institute's new seminar, Accident Case Study: Live, aims to put a new spin on safety-oriented accident analysis. Working with several compelling real-life cases, presenter and audience will play the role of accident investigator—starting at the crash scene and working backwards through physical evidence, eyewitness testimony, and other leads to figure out exactly what went wrong, and why.

**Directions:** There is no Pre-Registration for this seminar.

#### **A message from the National FAASafety Team Manager**

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at [www.FAASafety.gov](http://www.FAASafety.gov)!

## **Event Details**

**Wed, Mar 19, 2014 - 7:00 pm**

**Louisian State University**

Nicholson Drive Extension

Patrick F. Taylor Hall, RM 1119

Baton Rouge, LA 70803

**Contact: Robin Sharitz**

**301-695-2175**
