

## Fly by Night

### Fly by Night

Especially in light aircraft, flying after dark comes with real trade-offs. Smooth air, better performance, and stunning views are great—but they're offset by trickier landings, invisible terrain, and limited emergency options. So what's the key to staying safe after sundown?

ASI's new seminar looks at night flying from a risk management perspective. Using decades of accident data, we identify common problems and recommend the best ways to avoid them. Along the way, we talk about: Requirements for pilots and aircraft Unique flight planning considerations Why all nights are not created equal Things that can take you by surprise

**Directions:** Free Safety Seminar. There is NO pre-registration for this seminar.

### A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at [www.FAASafety.gov](http://www.FAASafety.gov)!

### Event Details

**Thu, Oct 19, 2017 - 19:00 EDT**  
**Sport Aviation Center of Western NY**

44 Eisenhower Drive  
Brockport, NY 14420
