

Why do good pilots make bad decisions?

AOPA ASI will review several recent accidents and the elements surrounding them and discuss why good pilots made decisions that ended tragically. Richard McSpadden will rely on research from the book "Think Again", which dissects the way the brain makes decisions. He'll lead the audience through some shortfalls of how the brain makes decisions and the implications of those shortfalls in aviation. Finally, he'll lead the audience through an exercise to "identify" and mitigate red flags which could lead to poor decision making.

Directions: Why do good pilots make bad decisions?

A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASafety Team) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
