

CFIT and You The Immovable Object and the Resistible Force

CFIT stands for Controlled Flight Into Terrain. What it means is flying a perfectly good aircraft into the ground for one reason or another. Many pilots think they're immune to accidents like these, but in certain scenarios it's remarkably easy to get taken by surprise. Join us for an in-depth look at various ways pilots tangle with terrain, and how you can avoid following in their footsteps.

Directions: This event will be held in the EAA Pilot Proficiency Center during EAA AirVenture.

A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
