

CONTINENTAL MOTORS

**Is coming to Huntsville
on February 24th 2007!**

**Discover new ways to improve engine reliability,
performance and customer satisfaction.**

The course is designed as an advanced refresher for certified technicians servicing, and inspecting Teledyne Continental Motors piston engine products. This training Program will meet the needs of your annual IA renewal.

This training date has limited spaces available so register now before the training slots are filled. The training class runs a full 8 hours in length and covers the following subject areas:

- **This training is applicable to all Continental engine models**
- **Inspections and maintenance of the following components**
 - **Crankcase**
 - **Cylinder Compression testing and Borescope inspection**
 - **Cylinder inspection**
 - **Cylinder Removal and Replacement**
 - **Turbocharging**
 - **Fuel Injection Systems**
- **Service Bulletin usage**
- **Fuel Injection System Set-Up & Adjustment discussions**
- **100-Hour/Annual Inspection topic discussions**
- **Using the TCMLINK Electronic Service Documents**

Training materials will be provided by Teledyne Continental Motors
