Dick Neher, of NACO will present us with answers to The Communication Challenges of The Chart Maker and the Pilot. If there was ever a need for clear, unequivocal communication it has to be that which must occur between the chart maker and the pilot. This seminar will answer those tough questions like ... What am I flying over? Who's Airspace am I in? How do I avoid TFR's? What altitude should I be at? How do I fold a chart for flight? How come I get lost... even when I have the chart in front of me?

*Directions:* From Dothan, north ~4 miles from Ross Clark Circle on US Highway 231 toward Midland City; Turn left on University Drive; go to Stop sign, turn right. Sony Auditorium is in the Library and Technology Building.

*Message from the National Safety Program Manager:*

**Safety is a learned behavior...Learn to be safer at the Learning Center found on
