

FAASTeam presents:

**(BHM) Operation Rain Check Birmingham, AI Shuttlesworth
International Airport Control Tower**

Birmingham Air Traffic Controllers will discuss local airspace procedures and review Letters to Airmen. Meet the folks you hear on your aircraft radio and get the answers to the questions you may be pondering. This seminar will give you new insight how ATC functions, what some of the local limitations are and how to better use the National Airspace System. Learn some of the common arrival and departure routes around the local airports in the Birmingham area.

This seminar will be a great opportunity for instructors to introduce students to ATC and older pilots to understand the logic that makes our National Airspace System work.

Directions: Entering the Birmingham, AL Shuttlesworth International Airport complex, turn left on 37th Ave N and take the service road to the Air Traffic Control Tower. At the gate press the call button and tell them you are there for the Safety Seminar.

A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASafety Team) is committed to providing equal access to this meeting/event for all participants.
