

# SERFI Know Your Light-Sport Experimental Amateur-Built Aircraft

Each year there is a disproportionate number of fatal aviation accidents involving Light Sport, Experimental and Amateur Home Built aircraft. Owner/Operator Maintenance is sometimes indicated as causal factors along with incomplete knowledge about specific aerodynamic characteristics of these aircraft that are not type certificated. At this informative briefing will discuss issues concerning flight testing and aerodynamic characteristic familiarity and promote best practices concerning owner/operator maintenance. Don't miss it. Click on the link below and register TODAY.

**Directions:** Seminar tent

## A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at [www.FAASafety.gov](http://www.FAASafety.gov)!

The FAA Safety Team (FAASafety Team) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
