

FAASTeam presents:

Learning Leaning - what that little red knob really does

"Learning Leaning" - A commonly misunderstood topic from student pilots all the way to CFI's! This presentation will go over proper leaning procedures, manufacturers recommendations and explanation of terms like "Rich of Peak", "Lean of Peak", and " Best Power". We will also explore practical ways to implement these items into our aircraft operations for optimal performance, fuel burn and engine longevity.

Directions: Fly in - Walk through FBO to exit towards the parking lot. Once exiting the FBO, Apollo Aviation is the white hangar building to the left. Walk through the main entrance and up the stairs. The classroom will be at the top of the stairs to the right.

Drive in - Park at the main FBO, Apollo Aviation is the hangar building to the right of the FBO if facing the FBO building. Walk through the main entrance and up the stairs. The classroom will be at the top of the stairs to the right.
