

BFC Safety Seminar

Every takeoff and landing is a chance to demonstrate true airmanship. This seminar takes a closer look at the techniques, judgment, and discipline that separate a routine takeoff or landing from an exceptional one.

We will explore how pilots can improve consistency, precision, and safety during two of the most critical phases of flight. We will discuss common errors, risk management considerations, and practical techniques that help pilots operate confidently in a variety of conditions and environments.

Whether you are a student pilot working toward your certificate or a seasoned aviator with thousands of hours, there is always room to refine the fundamentals. Join us for this two hour event as we explore the art and science behind safer, smoother, and more professional takeoffs and landings.
