

BFC Instrument Seminar

Not all instrument approaches are created equal. From precision approaches to modern satellite-based procedures, each type has its own capabilities, limitations, and operational considerations. “Understanding Instrument Approaches” explores the various approaches available to today's IFR pilot and how they fit into real-world flying.

This seminar will examine the differences between precision, nonprecision, and approach procedures with vertical guidance, while discussing when and why pilots might encounter each one. We will also look at equipment requirements, operational advantages, and common misconceptions that can lead to confusion in training and flight operations.

Event Details

Thu, Jun 25, 2026 at 18:00 CDT

Million Air Birmingham

4725 65th pl N, Birmingham, AL
Hangar 14

Birmingham, AL

Contact: ADAM KELLUM
