

## Mission Statement

We are a nonprofit organization formed for the purpose of:

- Championing women's professional growth
- Networking
- Promoting Education
- Fostering a sense of community
- Increasing public awareness of women in the industry.

Traditionally, aviation organizations have been founded to support pilots. Many in the aviation community, felt a need for an organization to support aviation maintenance, in particular females. This brought about the organization of an Association for Women in Aviation Maintenance (AWAM).

AWAM is open to all. Certification is not necessary to be a member. Our membership consists of a wide range of:

- Technicians – Engineers – Homebuilders
- Educators – Students – Pilots
- Corporations – Educational Organizations
- Many others interested in supporting women in aviation technology.

The Association provides professional development, personal involvement, representation in the industry and a sense of community.

Come join us. Become a part of what makes AWAM unique. Join the association that is making an impact in the aviation industry today!

Join or Renew online at  
[www.awam.org/membership](http://www.awam.org/membership)
