

SC FAASTeam presents:

# **The Number One Killer in General Aviation and How You Can Prevent It!**

The Number One Killer of Pilots... And How You Can Prevent It Barry Hull, Pilot Judgment Inc. Most aviation accidents are not due to medical or mechanical problems, but rather an entirely preventable element. Based on decades of study and analysis, and examination of major causes of fatal accidents, the number one killer of pilots is discussed. Techniques for prevention, examples, and visuals are used to supplement the discussion. Barry Hull is a retired U.S. Navy fighter pilot, commercial airline pilot, and small plane private pilot, and includes stories of all three realms of flying in his presentation. He also includes handouts at the conclusion of the talk to supplement his discussion. FAA Wings and AMT Award credit available.

**Directions:** T-hangars in the Sport Aviation Expo forum area. Location "L" on site map. Check daily forum schedule for details.

**A message from the National FAASafety Team Manager**

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at [www.FAASafety.gov](http://www.FAASafety.gov)!

The FAA Safety Team (FAASafety Team) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
