

Critical Decision Making

Critical Decision Making (CDM) seminars take an intensive look at general aviation safety, analysis of past accidents - including some Cirrus accidents - and create a formal method of conducting individualized safety routines for each of our pilots. This is a highly interactive seminar with lots of thought provoking discussion and analysis. A CDM seminar isn't really a seminar but rather a facilitated interactive hangar flying session where the group looks at general aviation and Cirrus statistics, reviews case studies of Cirrus accidents, and participates in the reenactment of an actual accident.

Directions: Hangar 11 Bay 3
