

## Understanding Impairment Risk

...42% of pilots in fatal crashes had some sort of drug/medications in their systems during the flight. Some of these medications carry very specific warnings not to perform task requiring alertness. Combinations of prescriptions and OTC medications can be particularly dangerous. A special invitation to ALL AME's and Doctors in the area to attend !

**Directions:** The meeting will be held in the bottom conference room at KSPA FBO

### A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at [www.FAASafety.gov](http://www.FAASafety.gov)!
