

## ADS-B Information Meeting

The event will review the airspace where ADS-B Out will be required along with an overview of ADS-B requirements per airspace. The event will also explain what is needed for an aircraft to comply with the ADS-B rule in addition to field approval guidance and prevention of common installation errors. With ADS-B operational across the country, the event will review what air traffic services pilots in equipped aircraft will have access to, i.e., to provide a new level of safety, better situational awareness, and more efficient search and rescue.

Finally, the event will provide an overview of how ADS-B works; the difference between ADS-B Out and ADS-B In; TIS-B, FIS-B and ADS-R; and how to get ADS-B services.

**Directions:** Please use map link.

### A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at [www.FAASafety.gov](http://www.FAASafety.gov)!
