

February Topic of the Month - Mountain Flying

This seminar will provide pilots with the basic knowledge to safely plan and fly in the mountains. While not a mountain flying course, you'll learn about mountain weather and procedures for crossing mountain ridges, updrafts and downdrafts. This information was prepared by the Colorado Pilots Association who recommends taking a Mountain Flying Course from an experienced mountain flying instructor.

Directions: Once you enter the FBO, the multi-purpose room is located to the left.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.
