

## Preflight After Maintenance

In this presentation we will discuss the consequences of inadequate preflight inspections of aircraft that are being returned to service after maintenance and common problems that have led to accidents. We will also give you guidance on coordinating with mechanics before flying aircraft recently maintained and paying particular attention to aircraft components that may have been affected by recent maintenance. This presentation will be followed by a CFI/DPE Forum.

**Directions:** See Map Link

First hangar on the right once you are on Opportunity Place. Conference room is in Northwest corner of the building. Enter on the front or side.
