

November Topic of the Month - CFIT and Over-Reliance on Automation

In this presentation we'll talk about Controlled Flight Into Terrain (CFIT) Accidents and recommendations from the General Aviation Joint Steering Committee - a work group that studies General Aviation Accidents. We will discuss the addition of tablets and smart devices to the cockpit. Are distractions in the cockpit a factor in CFIT? We will explore that possibility. Finally, we'll share some recommendations that will help you to avoid CFIT accidents.

Directions: See attached map.
