

FAASTeam presents:

June Topic of the Month - Aftermarket Safety Equipment

A number of technologies have proven useful in reducing the likelihood of general aviation accidents. For example, the helicopter and bush pilot communities as well as aerobatic pilots increasingly wear helmets and multi-point restraint systems for safety.

As with all technologies, pilots must be thoroughly familiar with limitations and proper operation of after-market equipment. We will discuss safety equipment that you can add to your aircraft, emphasizing restraint systems and tips for expeditious aircraft egress, possibly even in the dark or under water.

We will also touch on synthetic vision and angle of attack (AOA) indicators.

Lastly, we will discuss pilot proficiency and why it remains the most profound influence on flight safety.

Directions: Hello!

You are invited to a scheduled Zoom meeting.

Topic: FAASTeam June Topic of the Month - Aftermarket Safety Equipment

Time: Jun 4, 2020 03:00 PM Eastern Time (US and Canada)

Register in advance for this meeting:

<https://clemson.zoom.us/joining/register/tJwrdeCvqDMuHt3h2x98KvTlSaLvVKI9tgBI>

After registering, you will receive a confirmation email containing information about joining the meeting.
