

SC FSDO FAAS Team presents:

February 2022 Topic of the Month - Expanding Your Horizons- Stall/Spin/Upset Training

Pilots can become quite comfortable in their normal day-to-day flying. But what do we do if we get into a situation that is outside of our comfort zone? What do we need to do to recover from stalls, spins and unusual attitudes? When was the last time you practiced these type of maneuvers? What do you need to do to get proficient? We'll cover these questions and more in our seminar.

After the main presentation, we'll go over Basic Flight Planning on an iPad using ForeFlight and if time permits, Garmin Pilot.

Prior to attending this safety seminar, please review and abide by current CDC, State and Local health guidelines.

Directions: See map for directions. Once you enter the FBO, the multi-purpose room is located to the left.
