

SC FSDO FAAS Team presents:

June Topic of the Month After-market Safety Equipment

The world of aviation technology has changed.

To cite an example, General Aviation now has airplanes made of advanced composite materials where the pilot station is a digital suite of equipment. Many of these new systems and displays can be retrofitted into older airplanes making those aircraft safer and more reliable.

Dollars spent on these changes are not wasted as the upgrades have the potential to dramatically improve your safety and survivability.

Seatbelts, flight data monitoring, enhanced vision, synthetic vision, angle of attack systems, and electronic ignition systems are but a few of the many upgrades available discussed in this topic of the month.

Directions: From CAE, head south on Airport Blvd. Take the right onto Air Commerce Dr. and then right onto SC-602. Turn left onto Ermine Rd. In 1.5 miles, turn left onto US-1 S/Augusta Rd. Follow US-1 S into Lexington. At the intersection of Rt 378, continue straight ahead onto Old Chapin Rd and then make a left turn into the Flight Deck parking lot in 500 ft. The Flight Deck Restaurant is in the center of the shopping complex. The entrance is easily found off the courtyard near Barnes Jewelers and Horizon Travel.

Prior to attending a safety seminar please review and abide by current CDC, State and Local health guidelines.
