

Topic of the Month - Aircraft Performance Calculations

In this interactive seminar we'll talk a little bit about aircraft performance and how faulty performance expectations have led to accidents.

We'll cite General Aviation Joint Steering Committee (GAJSC) accident studies and safety enhancements that relate to aircraft performance. We'll offer some human and some technology-centered performance calculation solutions. And finally, we'll give you our recommendations for increased aircraft performance awareness.

Directions: The seminar will be held in the conference room. See attachment for Directions.

Prior to attending a safety seminar please review and abide by current CDC, State and Local health guidelines.
