

## August Topic of the Month - Personal Minimums and Weather Cameras

- Pilots should develop and periodically review, a set of personal weather minimums, preferably with a Flight Instructor.
- General Aviation accidents, such as Loss of Control and Controlled Flight Into Terrain, have occurred because pilots were flying in areas where weather information was unavailable.
- Near-real-time weather information, especially in mountainous areas, is not commonly available, but camera views can greatly aid pilots in determining whether sufficient ceiling and visibility exist.
- Pilots should be aware of the increasing presence of remotely-accessible weather cameras and should be instructed in their use.

### Event Details

**Sat, Aug 12, 2023 at 10:00 EDT**

**Beach Aviation Services - FBO,  
KMYR**

1250 Aerodrome Ave.  
Conference Room  
Myrtle Beach, SC

**Contact: GARY LYNN BURLESON**

**(843) 270-1100**
