

## Runway Incursions and Non-Towered Airport Operations

This seminar - for both pilot schools and the General Aviation community - will review the frequency of runway incursions, severity categories, and causal factors stemming from ATC incidents and pilot deviations. We will review select high profile runway incursion events and discuss pilot/controller responsibilities in avoiding runway incursions.

We will also review Non-Towered airport operations via the Advisory Circular 90-66 (C).

Located at MYR
