

April Topic of the Month - Stabilized Approach and Go Arounds

In this presentation we'll talk about Loss of Control Accidents and recommendations from the General Aviation Joint Safety Committee work group that studies loss of control. Then we'll define and discuss stabilized approaches and go-arounds. Finally, we'll give you some tips and tricks that will help you (or your student) fly stabilized approaches and go-arounds to avoid loss of control. These good practices apply whether you are flying under IFR or VFR flight rules. Let's all Fly Safe!

This is a Private Event open only to members of the Wings Over Winyah Flying Club. For additional information, contact FAASTeam Rep. Walter McElveen at (843) 340-0035 or wwmcelveen@gmail.com.
