

August Topic of the Month - Pre-flight and In-flight Weather Resources

The 21st Century has brought an unprecedented wealth of information to general aviation cockpits. Near real time graphical and textual weather products contribute greatly to pilot situational awareness and decision making. But pilots must understand the capabilities and limitations of the equipment and the information it provides. Additionally accidents and deviations from the *SC Safety Report will be discussed*.

This is a closed event open only to members of the Civil Air Patrol. For further information contact FAASTeam Rep. Dan Ahern at (843) 812-5421.

CAP Building located at OGB.
