

December Topic of the Month - Tips for Winter Flight Operations

It's that time of year again! Brush up on and discuss suggestions for cold weather operations. We'll discuss the following:

- Preflight tasks and even the commute to the airport can take longer.
- Forced landings in snow often feature fewer and less severe injuries but survival on the ground depends on having survival knowledge, skill, and equipment.
- Pilots must accurately conduct thorough pre and post flight inspections including the aircraft surfaces are free of snow, ice, and frost contamination.
- Pilots should wear clothing appropriate for outdoor activity in the environment over which they'll be flying.

Essential survival gear should be carried on one's person – not stowed in baggage compartments.

Event Details

Mon, Dec 1, 2025 at 18:00 EST

Pickens County Airport Main Building

240 Airport Rd
Conference Room
Liberty, SC

Contact: JAMES FRANCIS RUSSO

(203) 722-3648
