

## January 2026 Topic of the Month - Safety Risk Management for GA Pilots

We'll look at FAA studies that deal with deficiencies identified in a selection of general aviation accident investigations. We'll also take a high-level view of a process that has increased safety and effectiveness of aviation organizations world-wide. And we'll describe how that process can help individual pilots improve Aeronautical Decision Making, Crew Resource Management, and Safety Culture.

We'll also watch a video and have a discussion on a pilot who was not prepared for his flight.

See map for directions. Once you enter the FBO, the multi-purpose room is located to the left.

### Event Details
