

March 2026 Topic of the Quarter - Human Factors and the Wings Program

You may be wondering, what does Human Factors have to do with WINGS? Plenty. Leveraging our understanding of human factors improves our performance, communication, teamwork, situational awareness, and decision making. Threat and error management recognizes and accommodates human factors strengths and weaknesses. And, understanding how humans process information informs aircraft and systems design and automation.

We'll also watch and discuss a video on how Human Factors resulted in an accident that could have been avoided.

See map for directions. Once you enter the FBO, the multi-purpose room is located to the left.
