

April Topic of the Month - Angle of Attack Awareness

Stalls and spins still account for many general aviation accidents. Increased stall awareness training and the use of angle of attack indicators would significantly reduce the number of stall/spin accidents. In this webinar we'll discuss ways to recognize impending stall conditions, the benefits of flying with an angle of attack indicator, as well as proficiency training to prevent stall/spin accidents.

From I-385 exit south on N. Pleasantburg Dr, left on Keith Dr. (.4 miles) turn left on Airport Rd, straight ahead to CAP bldg on left. Parking adjacent to building.
