

April Topic of the Month - Angle of Attack Awareness

If you never exceed the critical angle of attack you will never stall or spin. Unfortunately, recent aviation accident history has shown that this is sometimes easier said than done. This seminar addresses what angle of attack is, how you control it, how and when it changes, common reasons for exceeding the critical angle of attack, and strategies to avoid these errors. Some of these safety corrections are procedural and some are done through technology. Attend the seminar and then decide what strategies you want to employ to manage your airplane's angle of attack. Fly Safe!

From CAE, head south on Airport Blvd. Take the right onto Air Commerce Dr. and then right onto SC-602. Turn left onto Ermine Rd. In 1.5 miles, turn left onto US-1 S/Augusta Rd. Follow US-1 S into Lexington. At the intersection of Rt 378, continue straight ahead onto Old Chapin Rd and then make a left turn into the Flight Deck parking lot in 500 ft. The Flight Deck Restaurant is in the center of the shopping complex. The entrance is easily found off the courtyard near Barnes Jewelers and Horizon Travel.
