

Angle of Attack Awareness

What is known is manageable. What pilot wouldn't want to refresh or even grow his or her knowledge of everything related to stalls, stall prevention and recovery. Statistically stalls and spins still account for many general aviation accidents. In this seminar we will discuss:

- GAJSC Loss of Control Accident Study
- Current Accident Statistics
- Stall aerodynamics
- AOA Indicators

The event will be held in the small conference room at Vantage Aviation located at the base of the tower at Greenville Downtown Airport. 100 Tower Dr, Greenville SC 29607. Parking will be at the front of the FBO. Once parked make your way through the double glass sliding doors and once you reach the front desk at the FBO make a right and the conference room will be about 50 feet down on your right. If needed the front desk will be occupied and they can direct you.

A message from the National FAASTeam Manager
