

Southern Region FAASTeam presents:

Avoiding Approach and Landing Incidents/Accidents

Approach and landing incidents refer to those situations where a pilot may have been able to land an aircraft safely, but did not. These types of accidents are one of two leading causes of aviation fatalities. We will analyze actual accidents and offer valuable safety tips. Don't miss this important safety seminar!

Directions: The Auditorium at the Broward County Aviation Department is located adjacent to the south east corner of the Fort Lauderdale Hollywood International Airport perimeter road on the north side of the facility.

A message from the National FAASTeam Manager

WINGS – The better way to meet your Flight Review requirement!
