

Aviation Weather

Weather occurring at low levels is of great significance to the aircraft that fly there, and to the aircraft that pass through when making an ascent or descent. It affects things like visibility, aircraft lift, and even the technique used by a pilot when operating a plane. We will discuss those weather issues that can be incredibly dangerous for pilots!

Directions: From Orlando area take Hwy 441 north thru Apopka toward Zellwood. 3 miles past Plymouth turn left into airport located along 441
From Mt. Dora area take Hwy 441 south thru Zellwood drive past airport on right to first right turn into airport entrance

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.
Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASTeam) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
