

The IIMC Threat Avoidance and Survival

Inadvertent Flight into Instrument Meteorological Conditions (IIMC) continues to be one of the leading lethal threats to helicopter operators. Despite advances in aircraft and avionics, we continue to suffer IIMC related fatalities year after year. This course will look at the unique aspects of IIMC and why it continues to claim so many lives. SMS based IIMC survival methods including training, CRM, policy suggestions and survival techniques will be discussed.

Directions: This class will be offered during the Aeromedical Transport Conference (AMTC) within the Charlotte Convention Center, in room #203A

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASTeam) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
