

## Surviving an IIMC Incident

Inadvertent Flight into Instrument Meteorological Conditions (IIMC) continues to be one of the leading lethal threats to general aviation. Despite advances in aircraft and avionics, we continue to suffer IIMC related fatalities year after year. This seminar will look at the unique aspects of IIMC and why it continues to claim so many lives. SMS based IIMC survival methods including training, CRM, policy suggestions and survival techniques will be discussed.

**Directions:** This class will be offered as part of the Airborne Law Enforcement Association's regional safety seminar. When arriving at the hotel, ask where the ALEA classes will be held. At the check-in desk for ALEA, inform them you are a registered FAA Wings participant and you will be admitted without charge.

### A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at [www.FAASafety.gov](http://www.FAASafety.gov)!
