

Understanding Airspace - UAS GA and Integration

Drones or UAVs are here to stay... but where can they and where can't they fly? What airspace can I fly in, and how are we going to work together to integrate them into the National Airspace System? Why is this so difficult, and what is being done or forecasted to come in the upcoming weeks or months to make it easier? What is LAANC and how does that affect me as a GA pilot, Controller, and/or Remote pilot? We welcome all Commercial or Amateur remote pilots as well as GA pilots. 2-hour presentation!

Directions: From the N, head S on US HWY 27 till you reach the crossroads of 27 and 98. Turn left, follow all the way down to the FBO, on your left.

From the South, head up US HWY 27 N past Lake Placid. Continue another 10 (+/-) miles. Turn right onto State Route 98, follow to the FBO near the end. The FBO is on your left.

A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
